Adobe Flash CS5

QUESTION: 86

Which method can be used to specify a cross domain policy file with a different name or file location than the default?

- A. Security.loadPolicyFile
- B. URLLoader.load
- C. Security.allowDomain
- D. ApplicationDomain.getDefinition

Answer: A

QUESTION: 87

You want to take advantage of hardware acceleration while using fullscreen mode for video Which statement about hardware acceleration is true?

- A. Hardware acceleration works only on Windows 7 and Snow Leopard
- B. They must have a DirectX 7 compatible video card with 4MB or more of Ram
- C. The fullScreenTakeOver property must be set to false to allow it
- D. All machines can now take advantage of hardware acceleration

Answer: B

QUESTION: 88

You want to use hardware acceleration during Flash's full screen mode. What must you do before entering full screen mode?

- A. Set the stage's fullScreenSourceRect property to a Rectangle defining the area to show as full screen
- B. Set the stage's displayState property to StageDisplayState.FULL_SCREEN_INTERACTIVE
- C. Set the stage's quality property to StageQuality.BEST
- D. Set the Capabilities class' hasScreenBroadcast property to true.

Answer: A

QUESTION: 89

Which scale mode will allow an SWF to scale without distorting the aspect ratio?

- A. Exact fit
- B. Show all
- C. No scale
- D. Maintain

Answer: B

QUESTION: 90

Which statement about Motion Presets is true?

- A. They can only be used for x and y movement
- B. They are only supported in Flash Player 10
- C. They are not supported in Flash CS4
- D. They can be exported and shared between users

Answer: D

QUESTION: 91

Click the Exhibit button.

```
package events
{
    import flash.events.Event;

    public class CustomEvent extends Event
    {
        public var custEvProperty:String;

        public function CustomEvent(pCustEvProperty:String, type:String)
        {
            super (type);
            this.custEvProperty = pCustEvProperty;
        }
        override public function clone():Event
        {
            return new CustomEvent(custEvProperty, type);
        }
    }
}
```

What are two benefits based on the code sample shown in the exhibit? (Choose two.)

- A. Provides for loosely coupled components

- B. The clone function allows you to use the constructor multiple times
- C. By extending the Events class, allows the addition of properties
- D. Simplifies the event to give more streamlined
- E. All code relied on is in this one class

Answer: A, C

QUESTION: 92

Which statement about an Interface is true?

- A. It is where the navigation is located on the stage.
- B. Lists methods and their implementation.
- C. Lists properties available across all classes in a project.
- D. Interfaces are implemented by classes to assure availability of methods

Answer: D

QUESTION: 93

Which statement about an Interface is true?

- A. To use, you must create an interface for each class
- B. You can use inheritance to define interfaces
- C. Interfaces define methods, properties and their implementation
- D. You instantiate interfaces like you would any other class

Answer: B
