# HP0-831

*Designing and Implementing Compaq SAN Solutions*

- A. a fabric consisting of McData directors
- B. a fabric consisting of Emulex switches
- C. a fabric consisting of Brocade switches
- D. a fabric consisting of Gadzoox switches

**Answer:** A, C

**QUESTION:** 93

What are two versions of cabling used in high availability configurations? (Choose two.)

- A. cross
- B. parallel
- C. straight
- D. multiplex
- E. synchronous

**Answer:** A, C

**QUESTION:** 94

What does the use of DRM in a Compaq heterogeneous SAN require?

- A. ATM links
- B. dark fiber links
- C. Level 3 configuration
- D. Level 4 configuration

**Answer:** D

**QUESTION:** 95

What are two advantages of non-SAN based centralized backup? (Choose two.)

- A. automated operation
- B. no single point of failure
- C. centralized management
- D. does not interfere with LAN bandwidth

**Answer:** A, C

**QUESTION:** 96

Which two affect data storage performance in an SAN-based EBS environment? (Choose two.)

- A. feed source
- B. LAN bandwidth
- C. data compression
- D. 50 um multimode fiber
- E. 62.5 um multimode fiber

**Answer:** A, C

**QUESTION:** 97

A customer has multiple disk subsystems in a heterogeneous SAN that includes a mix of Sun and Windows 2000 Servers. Each server currently has its own tape backup device. Currently, backup requires 16 hours and requires three operators. How can an EBS SAN solution benefit this customer? (Choose three.)

- A. It simplifies backup management.
- B. EBS shortens the backup window.
- C. It better utilizes hardware investment.
- D. It allows the concurrent use of all host-based tape drives.
- E. One server can better handle all the backup for the LUNs in the SAN.

**Answer:** A, B, C

**QUESTION:** 98

A customer has seven servers running Windows 2000. Five of the servers are running the client component of Backup Exec 8.6. The last server is designated as the ADAMM server with a ckup for t(w)Tj0 g/TT0 1eu23Tc 06eu20.00iir37.225 -1loc.2259(1 35/70 lib)5.5(ra)5.4(ry0052)with02

- A. attaching an MSL5026 (SDLT drives) to an MDR and the MDR to a 7 port hub
- B. attaching an MSL5026 (SDLT drives) to an MDR and the MDR to a SAN16 switch
- C. attaching an SSL2020 (AIT 50 drives) to an MDR and the MDR to a SAN16 switch
- D. attaching an TL891DLX (DLT 40/80 drives) to an MDR and the MDR to a SAN16 switch

**Answer:** B

**QUESTION:** 99

In a Windows NT and Windows 2000 Server environment, Backup Exec will support a maximum of \_\_\_\_\_ in a single EBS storage domain and data zone.

- A. 8 servers and 16 tape drives
- B. 16 servers and 16 tape drives
- C. 20 servers and 20 tape drives
- D. 32 servers and 32 tape drives

**Answer:** D

**QUESTION:** 100

What are backup zones created to do? (Choose three.)

- A. support two tape drives
- B. restrict the number of servers
- C. limit access to the tape libraries
- D. isolate LVD and HVD tape libraries
- E. segregate tape libraries by OS platforms

**Answer:** B, C, E

**QUESTION:** 101

What information must be gathered in order to use the EBS sizing tool? (Choose two.)

- A. backup window
- B. the EBS software vendor

- C. number of existing tape libraries
- D. Fibre Channel HBAs being used
- E. the type of data being backed up

**Answer:** A, E

**QUESTION:** 102

Which statement about an EBS sizer tool is true?

- A. It is a free download from Compaq.
- B. It must be purchased from Compaq.
- C. It must be obtained from a desired ISV.
- D. It comes packaged with all Compaq libraries.

**Answer:** A
